### **RELIGIOUS EXEMPTION VACCINE REFUSAL FORM**

I, \_\_\_\_\_, hereby state that I have chosen to not vaccinate because I am religiously opposed to vaccination according to the Book of Psalms, chapter 91 of The Holy Scriptures, which instructs us to put our complete trust in The Most-High for protection from disease(s), plagues and pandemics. This chapter, written thousands of years before vaccines were invented, highlights a recurring theme of my faith that one can live a long life in excellent health only through faith in Yahushua HaMashiach (Jesus Christ) and obedience to The Most-High's Commandments. The God of my faith, YAHUAH, warns in Jeremiah 17:5 that those who put their trust in humans vs. Him alone place themselves under His Curse.

Outside of clear instructions in Scripture concerning how to live a life free from disease, I maintain that I have investigated the reported risks and benefits of vaccination and the reported risks of the so-called "vaccine-preventable diseases." I maintain I am making the responsible and ethical choice for the following reasons:

1. Vaccination is a medical intervention performed that can injure or cause death (the CDC has recorded millions of injuries and deaths from vaccines through its VAERS system. The Vaccine Injury Compensation Court has issued BILLIONS of dollars in damages to families of those damaged by vaccines).
2. The fact that there cannot be a guarantee that the deliberate introduction of live or killed microorganisms into my body will not compromise my health or cause death either immediately or in the future.
3. There are no predictors in science that can give warning that injury or death may occur in any particular person that is vaccinated.
4. There are no proven assurances that the vaccine will protect me from contracting the disease, as indicated on ALL vaccine inserts.
5. There is an absence of adequate scientific knowledge regarding how vaccines interact with the human body on a molecular level.
6. Many vaccines contain the fetal material of aborted babies, which would constitute a gross violation of the ethical principles of my religious beliefs. Jeremiah 1:5 states The Most-High has a purpose for the life of every human being, even BEFORE they are formed in the womb.

Therefore, I believe that vaccination is a medical procedure that could reasonably be termed experimental each time it is administered.

The law in the State of \_\_\_\_\_ makes provision for non-vaccination for those who object to vaccines for religious reasons. I accept full responsibility for my health. I will not be vaccinated against my will.
